Jacob D. Castro

Santa Maria, California

jacob@jdc.dev

@jacobdcastro

Summary

A full-stack Web3 JavaScript/TypeScript developer with 5 years of experience consisting of freelancing, working at an e-commerce agency, and joining multiple early-stage startups (one YC-backed). Heavily focused on building full-stack dapps, including smart contracts, and participating in the Web3 ecosystem.

Experience

Coinbooks

Founding Engineer • Remote   04/2022 - 08/2022

- Developed a crypto invoicing dapp from scratch, and deployed alongside core accounting product
- Wrote, deployed, and maintained 2 smart contracts on the Ethereum mainnet.
- Integrated third-party accounting solutions, such as Quickbooks, with the core accounting app
- YC-backed startup
- Stack: SPA React, TypeScript, Next.js, Ethers.js, Solidity, Express, MongoDB

cocoNFT

Full-stack Developer • Remote   06/2021 - 04/2022

- Worked on an NFT minting and sales platform for creators on social media.
- Early-stage startup
- Tech stack: React, TypeScript, Next.js, Ethers.js/Web3.js, XState, Apollo GraphQL, PostgreSQL.

Jamersan

Frontend Developer • Remote   11/2020 - 06/2021

- Developed e-commerce websites for clients
- Took the lead of an internal Progress Web App initiative which would allow for new e-commerce sites to be built and deployed in under 24 hours.
- Tech stack: React, Next.js, Tailwind, BigCommerce theme development

JDC Digital

Freelancer, Owner • Remote   07/2017 - 11/2020

- Developed a complex full-stack tourist reservations app for a pre-seed startup
- Designed and developed static and dynamic websites for clients
- Managed and maintained over 10 long-term client relationships

Skills

HTML5/CSS3, JavaScript, TypeScript, React.js, Express.js, GraphQL, MongoDB, MySQL, Ethers.js, Solidity
